ATHANASIOS ZISOGLOU

zisoglou@hotmail.gr | +306982344561 | ziso89.github.io

SUMMARY

Software Engineer with experience in software development, embedded systems, and interactive exhibits. Combines strong analytical thinking with hands-on coding and testing expertise. Focused on quality, process efficiency, and continuous improvement in software delivery and performance. while also creating AI-assisted full-stack products. I bring a strong foundation in commissioning, installations, and technical support.

EXPERIENCE

FTTH Field Engineer | Alpha Πληροφορική

June 2026 – Present

- Installed, routed, and terminated FTTH fiber cables in residential and multi-dwelling locations
- Performed signal testing, network activation, and technical troubleshooting in residential locations

Skills: FTTH / Fiber Optics, Telecom Infrastructure, Signal Testing, On-Site Troubleshooting

Software Commissioning Engineer | Knapp AG

June 2025 – Feb 2026

- Delivered software commissioning for a large-scale warehouse automation system
- Configured and optimized software based on specific customer requirements
- Executed simulation and on-site integration testing ensuring high software reliability
- Supported clients during commissioning and training phases

Skills: SQL, Java, Python, Software Configuration, Testing

Embedded Software Engineer | Sunlight Group Storage Systems

June 2022 – September 2024

- Developed and tested BMS software for new energy storage products
- Analyzed and extended existing modules based on client needs
- Fixed bugs and improved software quality through peer code reviews

Skills: C, STM32, CANopen, IAR Embedded Workbench

Software Developer | Interactive Displays GmbH

March 2020 – February 2022

- Designed and implemented touch-enabled systems using OpenCV and Qt
- Developed microcontroller applications (Arduino, Raspberry Pi)
- Integrated Intel RealSense depth cameras for gesture detection

Skills: C++, Qt, OpenCV, Linux, Visual Studio

Software Engineer | Intralot

October 2019 – February 2020

- Delivered 3rd-level software support and implemented automation controls
- Diagnosed and resolved software issues by deploying permanent fixes

Skills: C, UNIX/Linux, Jira

Software Developer | Kurt Hüttinger GmbH

January 2017 – April 2019

- Contributed to 50+ interactive exhibition projects across Europe
- Developed embedded and multimedia applications using Arduino and Raspberry Pi

Skills: Embedded Systems, Sensors, LED Control, RS485, UART, SPI, I2C

Electronic & Electrician – Service & Installation Dept. | Kurt Hüttinger GmbH

August 2015 – January 2017

- Installed and serviced exhibits systems for Science & Technology Museums across the globe
- Executed electronic testing, troubleshooting, and upgrades based on client specifications

Skills: Siemens Logo! PLC · C · JavaScript · Hardware Integration · On-site Commissioning

Internship – Junior Software Developer | Kurt Hüttinger GmbH

October 2014 – May 2015

- Researched PC–PLC communication interfaces and prototyped new solutions for interactive museum exhibits
- Gained first international experience in a cross-functional German engineering team

Skills: PLC Programming · Prototyping · Technical Documentation

Part-time Computer & Network Technician | Prisma Electronics

April 2014 – August 2014

- Hardware & Software Support: Installation, upgrade, and configuration of operating systems, software applications, and peripheral devices.

Skills: IT Infrastructure, Network Installation, Hardware & Software Troubleshooting, Field Support

EDUCATION

B.Sc. in Computer Engineering | Eastern Macedonia & Thrace Institute of Technology, Greece *(2007–2015)*
Erasmus Exchange Program | Akademia Techniczno-Humanistyczna, Poland *(2011–2012)*
MOOC – Artificial Intelligence | Coursera *(2023–Present)*

TECHNICAL SKILLS

Languages:	C, C++, C#, JavaScript
Embedded:	STM32, Arduino, Raspberry Pi, CANopen, UART, SPI, I2C
Tools:	Visual Studio, VS Code, IAR, Qt, OpenCV, Git, Jira
Systems:	Linux, Windows

SELECTED PROJECTS

Mirotouch – *Interactive Displays GmbH*

Innovative product turning any screen into a touch surface using Intel Real Sense depth camera

Tech: C++, Qt, OpenCV, Linux, micro controllers

Automated Coffee Machine – *Diploma Thesis*

Fully automated coffee maker controlled via Bluetooth Android app

Tech: Arduino (C++), Java, Atmega328

FastDelivery

Full delivery management platform: web admin panel, store dashboards, driver & customer mobile apps with live order tracking. 40+ REST API endpoints · 4 user roles · Real-time tracking via Socket.IO.

Tech: Node.js · Express · MongoDB · React.js · React Native · Socket.IO · Google Maps API · JWT

Vafea Pro

A tool for professional painters with visit sessions merged into daily calendar blocks, real-world usage from a practitioner, and active UX/UI iteration.

Tech: Vanilla JS · PHP · MySQL · PWA · Android · UX/UI iteration

LANGUAGES & INTERESTS

Languages: Greek (Native), English (Business Fluent), German (Basic)

Interests: Outdoor activities (skiing, mountain biking), sci-fi series, cooking, exploring latest development trends
