

ATHANASIOS ZISOGLOU

✉ zisoglou@hotmail.gr | ☎ +30 6982344561 | 📅 02.02.1989 | 🇬🇷 Greek

SUMMARY

Software Engineer with over 11 years of experience in software development, embedded systems, and product integration. Combines strong analytical thinking with hands-on coding and testing expertise. Focused on quality, process efficiency, and continuous improvement in software delivery and performance.

EXPERIENCE

Software Commissioning Engineer | Knapp AG

June 2025 – Present

- Configured and optimized software based on specific customer requirements
- Executed simulation and on-site integration testing ensuring high software reliability
- Supported clients during commissioning and training phases

Skills: C++, Automation Systems, Software Configuration, Testing

Embedded Software Engineer | Sunlight Group Storage Systems

June 2022 – September 2024

- Developed and tested BMS software for new energy storage products
- Analyzed and extended existing modules based on client needs
- Fixed bugs and improved software quality through peer code reviews

Skills: C, STM32, CANopen, IAR Embedded Workbench

Software Developer | Interactive Displays GmbH

March 2020 – February 2022

- Designed and implemented touch-enabled systems using OpenCV and Qt
- Developed microcontroller applications (Arduino, Raspberry Pi)
- Integrated Intel RealSense depth cameras for gesture detection

Skills: C++, Qt, OpenCV, Linux, Visual Studio

Software Engineer | Intralot

October 2019 – February 2020

- Delivered 3rd-level software support and implemented automation controls
- Diagnosed and resolved software issues by deploying permanent fixes
- Automated application testing and monitoring processes

Skills: C, UNIX/Linux, Jira

Software Developer | Kurt Hüttinger GmbH

January 2017 – April 2019

- Contributed to 50+ interactive exhibition projects for science museums across globe
- Developed embedded and multimedia applications using Arduino and Raspberry Pi

Skills: [Embedded Systems](#), [Sensors](#), [RS485](#), [UART](#), [SPI](#), [I2C](#)

Electronic & Electrician in Service & Installation | Kurt Hüttinger GmbH

August 2015 – January 2017

- Installed and serviced electronic and software systems for Science & Technology Museums across the globe (75% travel)
- Participated in project planning and coordinated field technicians for system deployment and maintenance
- Executed electronic testing, troubleshooting, and upgrades based on client specifications

Skills: [Siemens Logo! PLC](#), [C](#), [JavaScript](#), [Hardware Integration](#), [On-site Commissioning](#)

Internship as Junior Software Developer | Kurt Hüttinger GmbH

October 2014 – May 2015

- Conducted research on communication interfaces between PC systems and PLC controllers
- Prototyped and implemented new interfaces for interactive science museum exhibits
- Gained first international experience working in a cross-functional German engineering team

Skills: [PLC Programming](#), [Prototyping](#), [Technical Documentation](#), [Teamwork](#)

Internship as Junior Computer & Network Technician | Prisma Electronics

April 2014 – August 2014

- Assisted in network configuration, PC maintenance, and system troubleshooting tasks
- Supported IT team with daily operations ensuring smooth technical performance
- Provided technical support to customers and internal users

Skills: [Networking](#), [Hardware Setup](#), [Troubleshooting](#), [Customer Support](#)

EDUCATION

B.Sc. in Computer Engineering | [Eastern Macedonia & Thrace Institute of Technology, Greece](#) (2007–2015)

Erasmus Exchange Program | [Akademia Techniczno-Humanistyczna, Poland](#) (2011–2012)

MOOC - Artificial Intelligence | [Coursera](#) (2023–Present)

TECHNICAL SKILLS

Languages:	C, C++, C#, JavaScript, Python
Embedded:	STM32, Arduino, Raspberry Pi, CANopen, UART, SPI, I2C
Tools:	Visual Studio, VS Code, IAR, Qt, OpenCV, Git, Jira
Systems:	Linux, Windows
Automation:	Siemens Logo! PLC

PROJECTS

Mirotouch - *Interactive Displays GmbH*

Innovative product turning any screen into a touch surface using Intel RealSense depth camera

Tech: C++, Qt, OpenCV, Linux

Automated Coffee Machine - *Diploma Thesis*

Fully automated coffee maker controlled via Bluetooth Android app

Tech: Arduino (C++), Java, Atmega328

LANGUAGES & INTERESTS

Languages: Greek (Native), English (Business Fluent), German (Basic)

Interests: Outdoor activities (skiing, mountain biking), sci-fi series, cooking, exploring latest web development trends
